

Reduce energy use and operating costs with our 2024 Indiana Natural Gas Business Custom Programs.

The Natural Gas Business Custom Program offers CenterPoint Energy's Indiana commercial and industrial natural gas customers (with service rates 120, 125, 220 or 225) incentives for qualifying natural gas projects that implement energy-efficient, cost-saving technologies. Custom Program incentives can help you offset up-front costs of your energy-efficient project.

Eligibility

CenterPoint's Indiana commercial and industrial natural gas service customers with service rates 120, 125, 220 or 225 who are not already covered by the our Natural Gas Business Prescriptive Program are eligible for Custom Program rebates.

Terms and conditions apply.

Examples of qualifying electric projects

Here are some examples of energy-saving projects that may qualify for a Business Custom Program incentive:

- Natural gas heating, ventilation and air conditioning (HVAC) projects
- Natural gas domestic water heating system control upgrades
- Outside air control projects
- Enhancements to air distribution, zoning and control of infrared heating systems
- Grain dryer upgrades
- Waste heat recovery projects

Applications for custom rebates MUST be preapproved by CenterPoint prior to purchasing or installing equipment and cannot be initiated prior to this. Allow up to four weeks to receive the preapproval notice.

We're here for you!

Visit CenterPointEnergy.com/INBusinessRebates to learn more about CenterPoint's rebate incentive program and to download a Business Custom Program Application. If you have questions about the program or need assistance with the application, contact us directly via email at IndianaBizPrograms@CenterPointEnergy.com or call 866-240-8476.

Current program incentive

The current rebate incentive is up to \$1.00 per therm saved on projects with a simple payback greater than one year. Project incentives are capped at 50% of project costs or \$100,000.

How the program works

Pre-installation

- Identify a possible energy-efficiency project at your facility.
- Download, complete and submit a Business Custom Program application prior to purchase or installation of equipment, along with a project summary, estimated cost and proposed energy savings. Your application and supporting documentation are reviewed to determine rebate eligibility.

Do not purchase equipment prior to application approval.

Installation

- Once your application is reviewed and approved, you will receive a project pre-approval letter. You can now purchase equipment and begin work on your project. You have up to 90 days to complete installation and claim your reserved rebate funds.

Post-installation

- When your project is finished, submit an itemized invoice, your project installation notice (PIN) and any final documentation. A program staff member may contact you to conduct a site visit to collect additional information, if need be.
- After the final review is complete, a rebate check will be mailed to you.

Rebates for our electric business customers

CenterPoint Energy of Indiana business customers with electric service in Posey, Gibson, Vanderburgh, Warrick, Pike, Dubois and Spencer counties can qualify for rebates on energy-saving projects. The rebate incentive is \$0.14 per kilowatt-hour (kWh) saved with a simple payback greater than one year. Project incentives are capped at 50% of costs or \$300,000.
