

Annual CCR Fugitive Dust Control Report

F.B. Culley Generating Station – East Ash Pond

December 10, 2020

40 CFR §257.80(c) Annual Fugitive Dust Control Report

The owner or operator of a CCR unit must prepare an annual CCR fugitive dust control report that includes a description of the actions taken by the owner or operator to control CCR fugitive dust, a record of all citizen complaints, and a summary of any corrective measures taken.

The F.B. Culley Generating Station has not received any citizen complaints regarding CCR fugitive dust related to the East Ash Pond since the prior Annual CCR Fugitive Dust Control Report was prepared on December 10, 2019.

Potential dust on roadways around the ash pond and temporary access roads within the footprint of the ash pond has been managed with the use of water trucks. The ash within the pond is generally saturated, which has prevented the occurrence of fugitive dust.
